## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3/9/04 has been entered.

### ***Allowable Subject Matter***

2. Claims 1-24 allowed.

The following is an examiner's statement of reasons for allowance:

- The primary reason for the allowance of claims 1, 6-11, 13-16 and 18-21 is the inclusion of the limitation of an ink jet print apparatus comprising a combination of a plurality of sub-flushing operation are intermittently repeated in one flushing with a first interval and each sub-flushing operation including a plurality of ink ejections repeated for a predetermined times with a second interval which is shorter than the first time interval. It is limitation found in each claims, as it is claimed in the combination, that has not been found, taught, or suggested by the prior art of record which makes these claims allowable over the prior art.

- The primary reason for the allowance of claims 2 and 3 is the inclusion of the limitation of an ink jet print head comprising an ejection frequency in a final flushing operation is higher than an ejection frequency in an initial flushing operation. It is limitation found in each claims, as it is claimed in the combination, that has not been found, taught, or suggested by the prior art of record which makes these claims allowable over the prior art.
- The primary reason for the allowance of claims 4 and 5 is the inclusion of the limitation of an ink jet print head comprising the repeated number of ink ejection in a final flushing operation is greater than the repeated number of ink ejection in an initial flushing operation. It is limitation found in each claims, as it is claimed in the combination, that has not been found, taught, or suggested by the prior art of record which makes these claims allowable over the prior art.
- The primary reason for the allowance of claim 12 is the inclusion of the limitation of an ink jet print head comprising a vibrating number is determined in accordance with the measured length of the stand-by time period. It is limitation found in each claims, as it is claimed in the combination, that has not been found, taught, or suggested by the prior art of record which makes these claims allowable over the prior art.
- The primary reason for the allowance of claim 17 is the inclusion of the limitation of an ink jet print head comprising the combination of a drive signal generator, which generated a common drive signal including a

flushing waveform configured to perform an ink ejection and a meniscus vibrating waveform configured to vibrate a meniscus of ink in the nozzle orifice. It is limitation found in each claims, as it is claimed in the combination, that has not been found, taught, or suggested by the prior art of record which makes these claims allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ebisawa et al. (USPN 5,805,180) discloses plurality of sub-flushing operation are intermittently repeated in one flushing with a first interval (Fig.24). However, Ebisawa et al does not teach each sub-flushing operation including a plurality of ink ejections repeated for a predetermined times with a second interval which is shorter than the first time interval as the present invention.
